

O/U 80

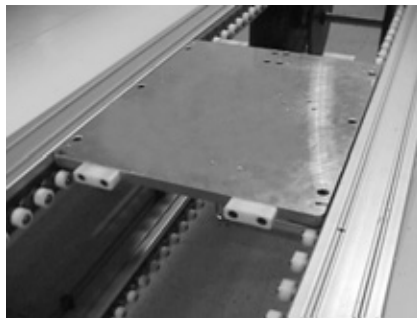

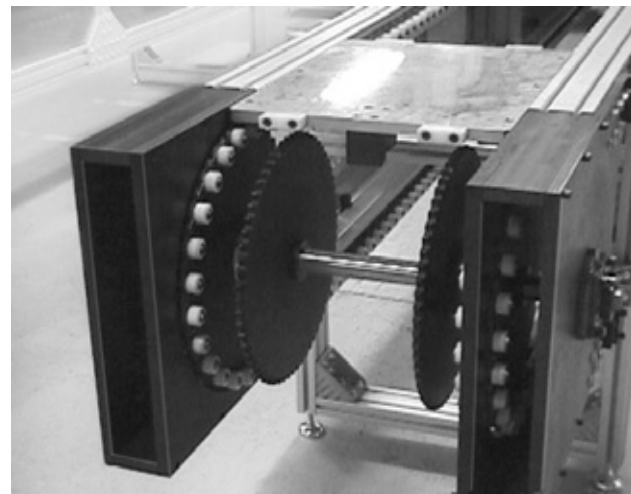

Lucent's O/U 80 Conveyor is the answer for your in-line system needs

The Lucent O/U 80 is a power and free in-line conveyor system that does not need a return conveyor to return the pallet back to the starting or load position. The pallet actually is guided around the drive sprocket rides upside down on the return chain then back around the return sprocket to a working position. No need for costly elevators or lift and transfers.

The pallet runs on dual strand roller chains and is trapped, so the pallet cannot be taken off line with out tools. The standard pallet size ranges from 10" x 10" to 36" x 36", special sizes are available upon request. Maximum part and fixture weight on the Lucent O/U 80 is 100 pounds per pallet. (Loads up to 25 pounds per pallet can be handled by the Lucent O/U 25.)

Pallet stops and lift and locates are available. The lift and locate lifts the pallet about .060" off the chain and locates the pallet +/- .010".

Each conveyor is built with ease of maintenance in mind and all Lucent conveyors come with a standard 3 year warranty.
